Education

Dhirubhai Ambani University(B.Tech - Mathematics and Computing)) <i>CPI: 9.84</i>	2022 - Present Gandhinagar, Gujarat
N. P. Bhalodia High School (Grade 12) (GSHSEB) <i>Percentage: 88.92, Pecentile Rank: 99.52</i>	2021 - 2022 Junagadh, Gujarat
Carmel Convent School (Grade 10) (GSEB) <i>Percentage: 91.00, Percentile Rank: 99.84</i>	2019 - 2020 Junagadh, Gujarat

Projects

University Scheduling and Booking System | DBMS, MySQL, Python

- Designed and built a conflict-free scheduling and room booking system tailored to Dhirubhai Ambani University's real-world requirements, addressing overlaps in room and user availability.
- Handled complete development lifecycle: gathered functional needs, designed a normalized schema, and implemented scheduling logic using MySQL and Python; scalable to support 3–4k users.

Social Media Article Engagement Prediction Using Titles | Machine Learning, Python, Google Colab

- Preprocessed FreeCodeCamp article data and built ML models to predict engagement metrics such as Twitter likes/shares and Medium claps using only the article titles.
- Trained and evaluated multiple classifiers including SVM, Naive Bayes, KNN, Logistic Regression, and Decision Trees.

AI-Agents for Pokémon Battles | Artificial Intelligence, Python

- Developed AI agents to simulate Pokémon battle decisions against human players.
- Implemented Minimax, Alpha-Beta Pruning, and Expectimax algorithms to model various levels of opponent behavior and uncertainty.

New York Taxi Trips Fare and Ride Volume Prediction | Machine Learning, Time Series Forecasting, EDA, Python

- Performed data understanding, exploratory data analysis (EDA), and preprocessing on NYC taxi trip data; developed SARIMA model for time series forecasting.
- Forecasts can aid in fare prediction and support government policy-making for optimizing public transportation routes.

URL Shortener | MongoDB, ReactJS, NodeJS, ExpressJS

- Built a full-stack web application that shortens long URLs, redirects users via custom short links, and allows users to create, view, and delete shortened URLs.
- Implemented RESTful APIs using Node.js and Express.js for backend services, and developed a responsive frontend using React.js for smooth client interaction.

Parallel Sorting Algorithms and PRAM Models Simulator | C++, Object-Oriented Programming, Parallel Algorithms

- Simulated parallel sorting algorithms that surpass the $O(n \log n)$ bound, and modeled PRAM variants (EREW, CREW, CRCW) in C++.
- Applied Object-Oriented Programming principles for modular and design; project used by students as a learning aid.

Elevator Model Checking | Formal Verification, Promela, SPIN Model Checker

- Designed a model of an elevator using the Promela language to simulate elevator operations and control logic.
- Verified multiple Linear Temporal Logic (LTL) properties using the SPIN model checker to ensure correctness, safety, and liveness of the system.

Experience

Venom Technologies

May 2025 - Jul 2025

Data Science Intern

Anand, Gujarat

- Collected and preprocessed data using SQL in MySQL and Python in Google Colab, performing cleaning, encoding, and scaling to prepare model-ready datasets.
- Explored data through visualizations to find key patterns, then built, tuned, and tested machine learning models using scikit-learn using metrics.

Dhirubhai Ambani University

Jan 2025 – May 2025

Teaching Assistant – SC224: Probability and Statistics

Gandhinagar, Gujarat

- Conducted weekly tutorial sessions and created custom problem sets to reinforce key concepts for a class of 150+ undergraduate students.
- Assisted the professor with course operations including grading, attendance tracking, and managing academic materials.

Peoples' Welfare Society

Dec 2023 – Dec 2023

Educational Outreach Fellow

Upleta, Gujarat, India

- Delivered interactive sessions on Mathematics, Science and Technology, Computer, and career guidance to school-age students from rural communities, adapting content to diverse learning needs.
- Introduced students to digital learning platforms and self-paced tools to foster independent learning and broaden access to quality education.

Technical Skills

Languages: C++, Python, Java, SQL

Developer Tools: VS Code, Google Colab

Libraries & Frameworks: scikit-learn, NumPy, pandas, ReactJS

Databases: MySQL, PostgreSQL, MongoDB

Soft Skills: Adaptability, Fast Learning, Team Leadership, Cross-Functional Collaboration, Clear Communication

Areas of Interest: Machine Learning, Artificial Intelligence, Web Development, Requirements Analysis & Product Design, Social Impact through Technology

Coursework: Artificial Intelligence (**CS50AI: Harvard University**), Machine Learning, Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Time Series Analysis, Exploratory Data Analysis, Parallel Distributed and Approximation Algorithms, Specification and Verification of Systems

Position Of Responsibility

Technical Events Lead

May 2023 – Present

i.Fest – DAU's Annual Techfest

- Led the planning and execution of 22+ technical events with 40+ team members for i.Fest (10,000+ participants); also co-led Public Relations, Content Creation, and Website Development teams.

Membership Development Officer

Jan 2023 – Present

IEEE Student Branch, DAU

- Directed all IEEE SB DAU events by leading a 50+ member team across planning, logistics, and resource coordination, ensuring effective execution and engagement.

Secretary

Jan 2023 – Present

Industrial Applications Society

- Managed a 15+ member team to conduct events focused on industrial applications, bridging student learning with pre-industry exposure and practical insights.

Student Member

July 2025 – Present

SPARK – Supporting Pedagogy, AI, Resources & Knowledge, DAU

- Part of DAU's SPARK initiative to enhance pedagogy through AI-driven research, inclusive practices, and development of impactful academic resources.

Achievements

- **Best Student of the Year (2019–2020)** at Carmel Convent School, Junagadh.
- Achieved the **highest CPI of 9.84** in the 2026 batch at DAU, including a perfect **SPI of 10.00** in Semesters 5 and 6.
- Served as **Group Leader in 16 academic projects** at DAU, leading teams ranging from 2 to 46 members.
- Reached the final round of the **Interwing Programming Contest (IWPC)**, conducted by the Programming Club, DAU.
- Secured **35th rank in Gujarat** among 46,000+ students in board exams.
- Ranked **1st in Junagadh District** in GUJCET with 115/120 marks and a 99.84 percentile.
- Solved **800+ problems on LeetCode** with a contest rating of **1629**. Username: vyomnarsana.
- Achieved a rating of **1670** on CodeChef for competitive programming contests. Username: vyomnarsana.
- Contributed to the **Online Encyclopedia of Integer Sequences (OEIS)** with sequence A369405.
